# WELCOME

**HIGH SECURITY SOLUTIONS** is present since 2004 in the Security, intelligence and Defense fields supporting your organization among our team of professionals with demonstrated international experience. Our personnel has the knowledge of working in government and private sector performing sustaining services to the democratic world and facing all types of threats.

We all live in a globalized society which offers many business opportunities and human development, however, those opportunities requires the display of technical and human resources -Including armed forces- in areas with a lack of security and associate services....

**THAT'S OUR MISSION:** Facilitate your work worldwide at any time and protect your interests and the ones of your organization.

As an enterprise with absolutely Spanish share and orientated to global services, we would like to be the final solution to your needs in terms of High tech security, Intelligence, Defense and field medicine. We facilitate our clients operations due that we understand the importance of their goals, their complexity and the necessity to carry-out it in the best way as possible...and we do it with suitable discretion, professionalism and integrating our experience and understanding with other cultures.

Our better references are the various projects achieved with enormous success in countries and regions so distant and with different environments such Venezuela, México, Iraq, Brazil, Haiti, Kenya, Spain or Poland to name a few...

# TRAINING

The heart of HIGH SECURITY SOLUTIONS is connected to consultancy services and training programs for police units and military forces. This sector has represented the "core" of our firm and its management team who has trained special units worldwide, from Iraq to Spain, Mexico, USA or Poland.

We execute tactical training programs adapting them to the current threats, adding the latest techniques used in high risk scenarios tested by our instructors in the same ones.

Our company also carry-out, starts up and evaluate anti-terrorist and public security plans identifying the different factors that converges to an adequate protection of potential targets, either strategic facilities National interests resources or Cities obliged to reduce their criminal rates.

We don't care of the dimension of the project, our company will be close to you analyzing your needs and designing the best systems and response protocols, contributing, according to the situation , with experience, knowledge and alternatives , crisis managing , avoiding crimes and improving life quality.

"from each according to ability, to each according to need"

# INTELLIGENCE

Our Intelligence division, was created as a need and support to the protection services that HSS perform, analyzing the risks of the environments in which we or could operate, advancing the geopolitical, financial and public security possible changes, contributing with specific details to improve the decision making of our human resources and clients.

The new High Technology obviously facilitates the work and the quality of the same one, however, communications via cellular phones are quite sensible and attacks to our IT systems are very often at all levels. The correct protection of our information and it's process, evaluating results and providing reports to the management's office is a key issue for the security of all organizations.

HIGH SECURITY SOLUTIONS presents the latest high tech equipment to protect your ground and air communications , also we secure your networks from external and internal attacks, perform mining and data extraction or Install electronic counter-measures. Our human resources are at your disposal to advise you in your decision-making analyzing all kind of information, answering to your questions-doubts about social o economic topics, evaluating geo-political risks and we indicate you the best way to mitigate potential threats.

"know your enemy, avoid hiis strong points and use his weak points..."

# RISK MANAGEMENT

Magical recipes do not exist in the security field, but we strongly think that Excellency is possible. That is what we want to offer you, quality based on a professional, methodic and technical work coordinated with the best resources, including high technology. This system assures to the client a high grade of satisfaction, guarantees your installations and employees security abroad and promotes the image of an organization that takes care of your resources.

Properties, information and personal security and protection Is nowadays a need for Public institutions, enterprises, NGO's and corporations operating worldwide, specially those organizations deployed in distant areas or with a lack of security. Reason why they require high qualified specialists in several security and protection fields .

HIGH SECURITY SOLUTIONS has a permanent risk evaluation group, which allows its operational team to perform their tasks with the best and updated Intelligence, deploying the human and technical resources needed for each case to avoid or mitigate damages coming from inside or externally.

We offer integrated solutions with capacity for protecting the following.

- o Oil pipe lines
- o Energy Installations
- o Maritime security (piracy)
- o Diplomatic security
- o Ex-pat protection
- o Private security training
- o K-9 Units (Narcotics, explosives)
- o Air security and safety
- o Convoy protection

" we'll find a way or we will create one..."

# DEFENSE

Armies of the XXI century must face new challenges and tasks which brings a change in their learning's equipments and duty protocols with a special focus on peacekeeping operations, humanitarian aid National Security issues, Global war against terrorism and environmental crisis.

At the same time, the IT systems are moving forward in parallel to the before mentioned advances allowing the armed forces a better organization, respond and operational capacities worldwide. However, these new tools requires from the military organizations an additional effort and a continues adjustment capacity;

Our firm facilitates that evolution and supports with technical resources the development of new operational options.

HIGH SECURITY SOLUTIONS offers integrated solutions to improve the most complex aspects linked to international operations and the management of high tech, Including the maintenance and management of C4I2, support to UXO's demining programs, tactical training, external deployment assistance, medical and health care services. Our Company is able to operate in distant environments: Afghanistan, Somalia, Lybia, DR of Congo, Sierra Leone, Pakistan or Iraq are some examples. With that capacity we can also facilitate the NGO's deployment worldwide, transporting humanitarian aid and collaborating in national reconstruction tasks.

"... a nation prospers o dies depending of the courage of its army"

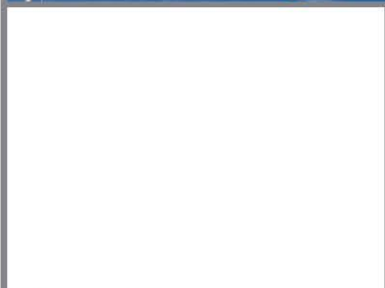

# EQUIPMENT

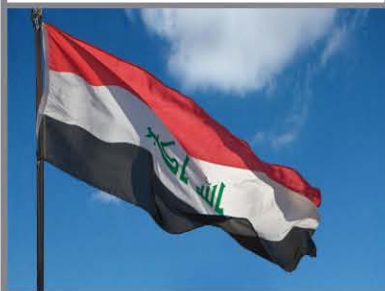

HSS provides additional assistance and support to his clients, for this reason, we maintain strategic agreements with some international firms involved in defense, communications and security related services, facilitating a better access to high tech resources and equipment. We can highlight the high-secure communication systems, tactical equipment, gear, weapons, TacMed kits, Unmanned Aerial Vehicles or Armored cars to name a few.

"We are at your convenience in more than 15 countries worldwide, to facilitate the correct development of your activity"
